

Turn your PC into a Professional Training Simulator for Electric Rope Shovel Operators

Just connect and calibrate the USB-ready simulator controls, and install and license the simulation software

Step 1: Use Your Own PC

Step 2: Connect our USB-ready Replica Controls

Step 3: Add our Electric Rope Shovel Simulation Software

Simlog's **Electric Rope Shovel Personal Simulator** puts trainees at the controls of a realistic electric rope shovel at work in a typical mine site, with a built-in interactive Mining Truck. The simulation features detailed modeling of the shovel's cables, an operator panel inside the cab, and several viewpoint options.

The unique **Instructional Design** provides **eight Simulation Modules** of increasing difficulty that begins with teaching trainees basic mastery of the controls, and ends with teaching advanced digging dumping and loading skills. For each Simulation Module, key **"Performance Indicators"** measure both the productivity and quality of the simulated work.

New operators will be able to reach their productivity goals faster while keeping accidents due to inexperience at a minimum. Even experienced operators will appreciate the opportunity for refresher training, in a way that's completely safe with lots of careful feedback providing a comprehensive picture of what it means to "do the job right".

Additional Personal Simulators are also available:
