

## Turn your PC into a Professional Training Simulator for Forwarder Operators

Just connect and calibrate the USB-ready simulator controls, and install and license the simulation software

Step 1: Use Your Own PC

Step 2: Choose one of our USB-ready Simulator Controls

PC

Replica

OEM

Step 3: Add our Forwarder Simulation Software

Simlog's **Forwarder Personal Simulator** puts trainees at the controls of a typical forwarder equipped with an articulated boom, telescoping extension, and free-swinging grapple attachment.

The unique **Instructional Design** provides **six Simulation Modules** of increasing difficulty that begins with teaching boom and grapple control, and ends with loading logs into the forwarder's cradle and unloading logs from the forwarder's cradle. For each Simulation Module, key "**Performance Indicators**" measure both the productivity and quality of the simulated work.

The commercial software license is just **USD\$ 4,000**, and this is a one-time-fee. New operators will be able to reach their productivity goals faster while keeping accidents due to inexperience at a minimum.

We offer **free software evaluation** with no time-out period.

Additional Personal Simulators are also available:
