

Turn your PC into a Professional Training Simulator for Mining Truck Operators

Connect and calibrate the USB-ready controls, then install and license the Simlog simulation software

Paso 1: Use Your Own PC

Paso 2: Choose one of our USB-ready Simulator Controls

Replica

OEM

Paso 3: Add our Mining Truck Simulation Software

Simlog's **Mining Truck Personal Simulator** puts trainees at the controls of a modern heavy hauler at work in a typical mine site.

The unique **Instructional Design** provides **nine Simulation Modules** of increasing difficulty that begins with controls familiarization, and ends with teaching trainees to perform a complete haul cycle with loading and dumping. There's even a simulated electric rope shovel built right in, to help teach truck spotting. For each Simulation Module, key **"Performance Indicators"** measure both the productivity and quality of the simulated work.

The commercial software license is just **USD\$ 11,000**, and this is a one-time-fee. New operators will be able to reach their productivity goals faster while keeping accidents due to inexperience at a minimum.

We offer **free software evaluation** with no time-out period.

Additional Personal Simulators are also available:
