

Turn your PC into a Professional Training Simulator for Wheel Loader Operators

Just connect and calibrate the USB-ready simulator controls, and install and license the simulation software

Step 1: Use Your Own PC

Step 2: Choose one of our USB-ready Simulator Controls

Step 3: Add our Wheel Loader Simulation Software

Simlog's **Wheel Loader Personal Simulator** puts trainees at the controls of a modern wheel loader at work in a typical quarry with virtual digging.

The unique **Instructional Design** provides **eight Simulation Modules** of increasing difficulty that begins with controls familiarization, and ends with teaching advanced digging driving, dumping and loading skills. There's even a simulated off-highway truck built right in, to help teach truck spotting. For each Simulation Module, key **"Performance Indicators"** measure both the productivity and quality of the simulated work.

The commercial software license is just **USD\$ 6,000**, and this is a one-time-fee. New operators will be able to reach their productivity goals faster while keeping accidents due to inexperience at a minimum.

We offer **free software evaluation** with no time-out period.

Additional Personal Simulators are also available:
